## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance: Applicant has amended claims 13 and 14 to differ them from claims 1 and 2 of U.S. Pat. 6,335,231. Applicant has also pointed out the difference between claim 3 of the present application and claim 3 of U.S. Pat. 6,335,231. Regarding the prior art, as stated in a previous action, the most relevant reference, as in the parent case, is Hasegawa. The Hasegawa patent, which was the main reference teaching a silicon substrate with a main face of (110) did not teach a method of forming a semiconductor device in which the active layer of the device consisted of a single crystal layer having a face of (1 10) which was originally part of the substrate. In Hasegawa, the active device layer is a single crystal layer having a (1 10) face which was grown on top of the substrate using the substrate as a seed, and was therefore on the other side of the insulating layer, unlike the process described in independent claims 1-2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
